

MEMO**To: Jim Martin****From: Robin Reynolds****Subject: Follow-up to meeting of January 6, 1997****January 10, 1997**

Thank you for setting up the meeting on January 6. For your information I have attached a copy of the notes I wrote on the meeting. Please let me know if I missed anything.

I would like to start work on several of the items we discussed. These are:

- An exotic species program.
- Developing the concept of ecosystem restoration/agriculture rotation in areas of peat soil subsidence into specific implementable policies and actions.
- Developing the concept of permanent, mutually beneficial, mosaics of agricultural use among ecosystem restoration land uses into specific implementable policies and actions.

I believe that these three have good potential for general support. Also these would likely be appropriate for inclusion among the early implementation actions. Exotic species eradication actions would be especially well suited for early implementation since the CDFA has already completed the environmental documentation.
